Final Exam for second Semester (2024/2025)

Course Name : Introduction to Economics	Course Code : H 205	Bylaw :2024
Year : 1 st level	Department : Computer Science	
Date of Exam : 4/6/2025	Time Allowed : 2 Hours	Total Points: 60
Course Professor : Dr. Mohamed Mashhour	No. of question: 4	No. of Pages :4

Model A

Exam instructions

- Make sure that the question form is identical to the answer sheet form
- The answer sheet must be in good condition from the moment received until it is delivered after taking the exam
- Do not bend the answer sheet or lean on it while answering

Answer the following questions :

Question1 : Choose the Correct Answer (20 Grade) (ILOs :a1;a2;a3;a4.b3.d2)

Which of the following topics would be studied in a microeconomics course				
	A	B	C	D
1.	How a trade agreement between the United States and Mexico affects both nations' unemployment rates.	Comparing inflation rates across countries.	How rent ceilings impact the supply of apartments.	How a tax rate increase will impact total production.
Macroeconomics is the branch of economics that studies				
	A	B	C	D
2.	prices of individual goods	the economy as a whole	the way individual markets work	important, as opposed to trivial, issues.
Law of demand				
	A	B	C	D
3.	negative relationship between price and quantity demanded	negative relationship between price and quantity of supply	Positive relationship between price and quantity of demand	Positive relationship between price and quantity of supply
The factor of production are				
	A	B	C	D
4.	labor and land	labor , land ,and capital	labor , land , and entrepreneur	labor , land , entrepreneur , and capital
Any point on the PPF is				
	A	B	C	D
5.	efficient	unemployment	inefficient	unattainable

Reaching point G requires:

6.

A	B	C	D
less resources	economic growth	less technology	more unemployment

From graph in point 6 : The opportunity cost of increasing output from 400 to 600 pounds of potatoes is

7.

A	B	C	D
550 pounds of potatoes.	500 pounds of fish.	100 pounds of potatoes.	100 pounds of fish.

GDP is defined as the market value of all in a given time period.

8.

A	B	C	D
final goods produced in a country.	final goods and services produced by citizens of a country regardless of where they are located.	final goods and services produced in a country by only the citizens of the country.	final goods and services produced within the borders of a country.

Intermediate goods are excluded from GDP because

9.

A	B	C	D
their inclusion would involve double counting.	they represent goods that have never been purchased so they cannot be counted.	their inclusion would understate GDP	they are hard to measure.

GDP equals

10.

A	B	C	D
$C + S + G + (X + M).$	$C + I + G + (X + M).$	$C + I + G + (X - M).$	$C + S + G + (X - M).$

The labor force is defined as

11.

A	B	C	D
people with full time jobs	workers with jobs and unemployed workers.	all people capable of work.	All of the above answers are correct.

The long-run aggregate supply (LAS) curve

12.

A	B	C	D
has a positive slope.	has a negative slope.	is vertical.	is horizontal.

The aggregate demand (AD) curve			
13.	A has a positive slope.	B has a negative slope.	C is vertical. D is horizontal.
..... controls the money supply and interest rates to influence the economy.			
14.	A exchange rate policy	B Monetary policy	C fiscal policy D trade policy
..... is the value of one currency in terms of another currency.			
15.	A The money	B A trade	C An exchange rate D GDP
According to Law of supply, If the price of computers were to increase,			
16.	A then the quantity supplied of computers will decrease	B then the quantity supplied of computers will increase	C then the quantity supplied of computers will be constant D then the quantity supplied of computers will decrease or increase
The government spends on government expenditure to provide			
17.	A public goods to its citizens	B privet goods to its citizens	C final goods D intermediate goods
A persistently rising price level is called			
18.	A The money	B trade	C inflation D GDP
The market equilibrium occurs when,			
19.	A quantity demand = quantity supply	B quantity demand more than quantity supply	C quantity demand less than quantity supply D demand less than supply
Unemployment rate			
20.	A employed / labor force	B employed / labor force * 100	C unemployed / labor force D unemployed / labor force * 100

Question 2: State if the following statements are true or false (10 Grade)(ILOs:a1;a2; b3)

1. The economic problem means resources are unlimited and wants are limited. ☒
2. Our inability to satisfy all our wants is called scarcity. ☒
3. When income increase the demand of normal good increase ☒
4. advanced technology led to increase in supply curve ☒
5. The price of factor of production is the factor affect demand. ☒
6. The supply curve is the graph shows the negative relationship between price and quantity of supply . ☒
